Product Description: Eric Tech Storefront

1. Interface Overview

Base Application: A headless Shopify storefront built on Next.js 15. **Theme:** Minimalist design with support for both Light and Dark mode. **Core Navigation:** A global header containing a logo, navigation links (fetched from Shopify menus), a search bar, and a cart icon with an item counter.

---

2. Page-Specific Features

A. Homepage (The Entry Point)

- **Featured Grid:** A three-item grid at the top showing products from the hidden-homepage-featured-items collection.
- **Product Carousel:** A horizontally scrolling list of products from the hidden-homepage-carousel collection at the bottom of the page.
- **Marquee Effect:** A scrolling animation for product titles and prices.

B. Product Detail Page (PDP)

- **Image Gallery:** Large product images with "Next" and "Previous" navigation.
- **Selection UI:** Buttons for selecting product variants (e.g., Sizes: S, M, L, XL or Colors: Black, White).
- **Description:** Renders product descriptions as HTML directly from the Shopify backend.
- **Add to Cart:** A sticky button that adds the selected variant to the persistent user session.

C. The Cart System (Slide-out Drawer)

- **Trigger:** Clicking the cart icon in the header opens a side drawer from the right.
- **Functionality:** * Displays a list of added items with thumbnails.
    - Allows "Plus" and "Minus" adjustments for quantity.
    - Features a "Delete" button for each line item.
    - Displays a calculated subtotal and estimated taxes.
    - Contains a "Proceed to Checkout" button that redirects to the Shopify checkout domain.

---

3. Current Logic & Behaviors

- **Search Functionality:** The search bar uses /?search= query parameters to filter the product grid in real-time.
- **Empty State:** If the cart is empty, the drawer displays a "Your cart is empty" message with a "Continue Shopping" button.

- **Persistence:** If a user adds an item and refreshes the page, the item must remain in the cart (handled via cookies/local state).
